Price, who less than three years ago was deposed with a crash that rang around the

world.

Cotton is king again, however, and Price is king of cotton. With 500,000 bales to his credit he said his holdings a short time ago at a profit estimated at 2 cents a pound, a clear profit on the transaction of \$5,000,000. In May, 1900, Theodore H. Price began his financial career from a new beginning with a few paltry hundred dollar bills in his pockets, and a wife. On Monday, May 28, 1900, Theodore H. Price was to have been married to a young woman to whom he had been engaged for a year. His bachelor dinners was set for the night of the day on which he failed.

The young woman was Harriet Engenia Dyer, daughter of the late General Alexander B. Dyer, United States Army and possessed something of the army spirit. Any proposition looking to breaking the engagement was promptly disposed of by her. Instead the date of the marriage was changed for the following Saturlay, the 26th of May, instead of Monday, the 35th, and, instead of a wedding in a church filled with mutual acquaintances, there was a imple little ceremony in the drawing-room

DIED AND CAME TO LIFE.

It will be remembered that the air was cold. Miss Curzon's gown was thin and she contracted a heavy cold, which kept her to her bed the next day, The following day the physician announced that her case was a light attack of pneumonia, but she suffered so little that several friends were allowed to come into her bedroom.

They laughingly congratulated her on her success of the party. The next day, too, her condition gave no cause for alarm, and she conversed with the members of her family who came into the room. It was thought that all danger had passed.

Then she began to rink rapidly, and the family was called into the sick room. After several hours the physician turned away from his patient and sorrowfully told those gathered about the bed that there was no hope.

gathered about the bed that there was no hope.

One by one the members of the family kissed her good-by and looked for the last time, as they thought, upon her face in life. The doctor held her pulse for a few minutes, and, after a trying silence, broke only by sobs, said that the last spark of life had gone.

The relatives left the room, the physician wont away and the undertaker came. He entered the loom to emhalm the hody and prepare it for burish. He took the usual precautions to see if life had entirely fied and saw no sign that the girl was alive.

SAVED BY UNDERTAKER.

Turning a moment from the bedside to prepare the board, the undertaker on returning saw that the right arm, which had resited limply at the girl's side, had been raised to her face. Used as he was to grew-some scenes, he shuddered at the sight, but bent over her and gazed anxiously at her face.

face. At last a slight quivering of the eyelids was noticeable, and with a startled cry he called the young woman's father. The physician was called again and the work to save her life renewed. In half an hour she sighed, opened her eyes and smiled, and then closed them again in peaceful sleep.

The crisis, the doctor said, had passed.
